- Decision making
- Communication
- Multi-tasking

Education Background

- Shree LR Tiwari degree college of arts commerce and science
  BSC IT
  Completed in 2023
  CGPI : 8.18

About Me

Hello! I'm Amit Pandey, a creative and passionate Web developer and Python Programmer. Born and raised in Bhayandar (E), I've always been fascinated by the power of designing, developing and deploying web applications

My journey in web development began at Shree LR Tiwari Degree college of arts commerce and science, where I honed my skills in various technologies for web development

My love for both front-end and back-end technologies led me to become a Full Stack Developer. Whether it's crafting elegant user interfaces or optimizing database queries, I enjoy every aspect of building robust web applications.

I'm excited about the opportunity to collaborate on projects that require innovative thinking and a keen eye for detail. Let's create something amazing together!

Projects

Block verse: A 3D Block Game

2021–2022

Git-hub: *https://github.com/Amit976-dev/Block-Verse*

Features:
- Players can choose textures from their own files to customize the appearance of blocks in their world.
- Like Minecraft, players have the freedom to build and design structures using a variety of textured blocks.
- Inventory Management: Players can break blocks, store them in their inventory, and place them elsewhere, allowing for dynamic world-building.
- Immersive Experience: Block Verse offers an immersive experience with the ability to modify the game world in real-time.
